

MINICURSO DE INTRODUÇÃO AO REACT NATIVE

By Luís Gustavo

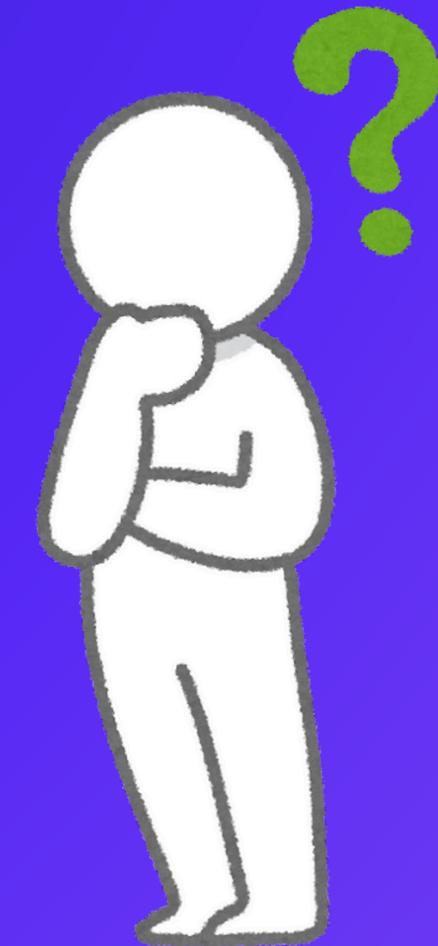

APRESENTAR

- Luís Gustavo
- Técnico em Agropecuária
- Licenciado em Computação
- Desenvolvedor de Software na PecSmart - Home Office
- Python, Django, FastAPI, SQL(MariaDB), Linux, AWS ...
- Sócio em 1 Startup @oxfood.app - Estágio inicial, tenho outros projetos
- Site: <https://iadevlab.com/>

VOCÊS JÁ PENSARAM EM DESENVOLVER APLICATIVOS?

- O que precisamos saber para desenvolver aplicativos?

QUAIS TECNOLOGIAS TEMOS DISPONÍVEIS?

- **Nativo**
 - **Kotlin/Java (Android)**
 - **Swift (IOS)**
- **Multiplataforma**
 - **React Native (JavaScript)**
 - **Flutter (Dart)**

O QUE É O REACT NATIVE

The screenshot shows the official React Native website. At the top, there's a dark navigation bar with the React Native logo and a search bar. Below the header, the main title "Create native apps for Android, iOS, and more using React" is displayed in large white text. A descriptive paragraph follows, stating: "React Native brings the best parts of developing with React to native development. It's a best-in-class JavaScript library for building user interfaces." To the left, a code editor window shows the "index.js" file with the following code:

```
function HomeScreen() {
  return (
    <View>
      <Text> Hello World 🌎!</Text>
    </View>
  );
}
```

Two smartphone icons are shown on the right, both displaying the text "Hello World 🌎!" on their screens.
